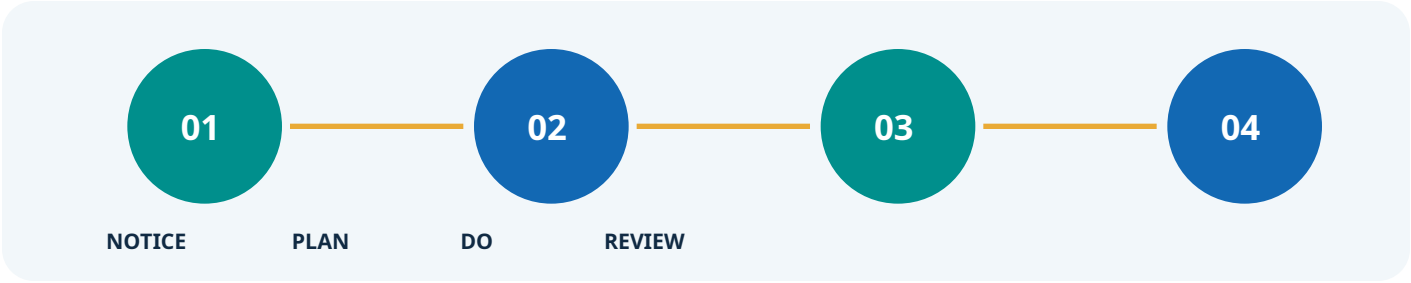
This book provides general education and awareness, not professional, financial, legal or medical advice. It does not promise employment, business revenue, certification or any specific result.

PUBLISHING CHECKLIST

Before commercial distribution, confirm ownership and permissions for all assets, verify text and claims, complete proofreading, determine pricing, ISBN needs and tax treatment, and check current platform rules.



> “Useful skills grow when learning is connected to action.”

THE POWER & MAGIC OF SKILLS 2026

A Message from Sunil Chawla

UNDERSTAND |

Skills should not be limited to a classroom, a degree or a particular profession. This book invites every reader to identify useful abilities and practise them in small, realistic steps.

REAL-LIFE STORY |

A school student wants to speak with confidence. A shopkeeper wants to serve customers better. A craftsperson wants to present handmade work online. Each person needs a different starting point.

PRACTICAL METHOD |

Respect different goals and learning speeds • Choose one skill that matters now • Record progress instead of comparing people

YOUR ACTION |

Write one reason you want to learn a new skill.

REFLECTION |

What would a small, meaningful improvement look like in your life?

आज का सीखने का मंत्र

एक Skill चुनिए, छोटा अभ्यास कीजिए, अपनी प्रगति लिखिए और सीखते रहिए।

> “Every learner deserves a practical starting point.”

THE POWER & MAGIC OF SKILLS 2026

Our Vision & Mission

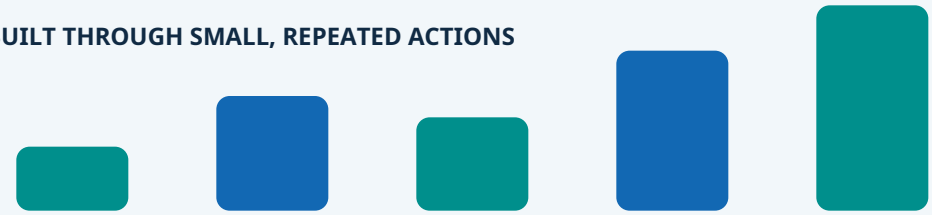
UNDERSTAND |

Mission: make skill awareness accessible and encourage lifelong learning, development and real-life application. Vision: contribute to a society where people of all ages can discover strengths and continue learning.

REAL-LIFE STORY |

A community learning circle could bring together students, parents, artisans and professionals to share useful knowledge without assuming everyone has the same resources.

PROGRESS IS BUILT THROUGH SMALL, REPEATED ACTIONS



PRACTICAL METHOD |

Awareness: understand the need • Development: practise with support • Application: use learning responsibly

YOUR ACTION |

Write your own one-sentence learning mission.

REFLECTION |

Who could benefit if you share what you learn?

आज का सीखने का मंत्र

एक Skill चुनिए, छोटा अभ्यास कीजिए, अपनी प्रगति लिखिए और सीखते रहिए।

> “Awareness inspires; practice builds capability; application creates value.”

THE POWER & MAGIC OF SKILLS 2026

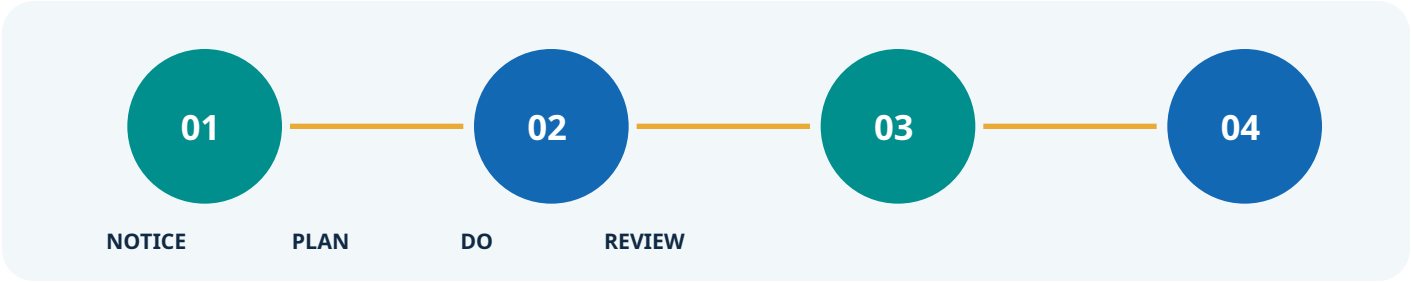
Knowledge, Degree, Skill & Experience

UNDERSTAND |

Knowledge helps us understand ideas. Degrees document formal learning. Skills help us perform tasks. Experience develops judgment through real situations. These complement rather than replace one another.

REAL-LIFE STORY |

Knowing the rules of photography differs from taking clear photographs. A qualification may be required for regulated work; experience helps a person adapt to varied settings.



PRACTICAL METHOD |

Identify what you know • Demonstrate what you can do • Seek feedback and relevant credentials

YOUR ACTION |

List one example of knowledge and one example of skill from your life.

REFLECTION |

Where is formal qualification essential in your chosen field?

आज का सीखने का मंत्र

एक Skill चुनिए, छोटा अभ्यास कीजिए, अपनी प्रगति लिखिए और सीखते रहिए।

> “Information becomes more valuable when we can apply it responsibly.”
